Profile

An industry-leading product, Goodwill ERP is a simple menu-driven ERP, developed with DTR technology & latest integrated tools. Goodwill ERP has the power, speed, flexibility and robust data management architecture to guarantee information consistency and tamper proof security facility ensuring the safety of data and the system as a whole.

Since its launch in 1995, Goodwill ERP suite has helped scores of Small & Medium Enterprises to become more efficient and productive. The product contains comprehensive features that enable you to effectively manage your business operations across multiple companies, divisions, and individual sites. With Goodwill ERP, you can

not only meet all your statutory accounting and reporting duties but also manage integrated processes better and minimize risks. This way, you can focus on strategic aspects of your business, respond to changes and seize opportunities.

A notable feature of Goodwill ERP is its scope of Customization; it can be customized to cater to all, that is, Accounting, Inventory, Manufacturing, Order Management, Payroll, HR & MIS needs. In addition, it easily plugs in to any business process without effecting any changes.

Looking ahead, we endeavor to exceed our client's expectations and become the first choice integrated ERP solution provider.

Goodwill ERP, designed for forward-thinking organizations, is an integrated, adaptable business management solution that works to help and automate the transactions of manufacturing -, service- and distribution-driven businesses. It empowers people to work more effectively together to accelerate business productivity and provides managers insights to help, monitor and grow their company through confident decision making.

Fits Into Your Organisation Requirements:

Goodwill ERP Application's in-built design flexibility allows it to work according to your Business Requirements. It can be customized and configured in line with your requirements, without modifying source code, so your long-term cost of supporting modifications is minimized.

Acclerates Business Productivity

Goodwill ERP accelerates business productivity by automating business processes and delivering flexible solutions that can be adapted to meet companies' needs. In addition, it uses a flexible architecture that makes it easy for businesses and their technology providers to customize the solutions to changing business needs.

Enables Confident Decision Making

Goodwill ERP produces presentation-ready reports for managers, executives and board meetings. Goodwill ERP easily distributes period & year-end closing & ad-hoc reports to the right people, at the right time, in the right format. Get the view you want with the drill-down detail you need.

Runs The Business at The Speed of Light

Goodwill ERP efficiently processes orders without the errors and time delays associated with manual processes, offers tight integration with Order Management, Inventory, and Purchasing applications, providing seamless extension of your solutions as demanded by your customers and vendors. In addition, Goodwill ERP can create and customize reports to meet your needs:
